LEARNING AND TEACHING NEWS

#11 - OCTOBER 2023

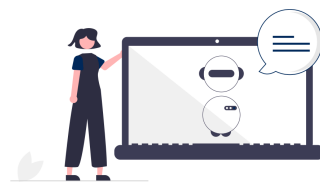

en partenariat avec
KNOWLEDGE HUB
LIBRARY BY AUDENCIA

EDITO

In this edition, we offer a diverse range of themes capturing the dynamic essence of education at the beginning of the 2023 academic year. The use of GenerativeAI remains the dominant topic in the news, but the human contact aspect of learning and teaching has not disappeared. Another faculty-based event will be organised to discuss the role of a faculty member in a world where AI is generalised- watch out your inbox for the invite.

L&T in the news

[AI in education \(FR\)](#) remains a hot topic and OpenAI, the company behind ChatGPT and Dalle, issued a guide on how AI is [transforming teaching \(EN\)](#) and education, promising both innovative learning experiences and raising important ethical questions. In this vein, we like to share the [Montréal Declaration of ethical use of AI in education \(FR\)](#).

You can also find some practical advice on how to use GenerativeAI to better [prepare the teaching of your case study \(EN\)](#) or to [refresh your syllabus \(EN\)](#). You are invited to attend the [event organised in partnership with Audencia on AI \(FR\)](#).

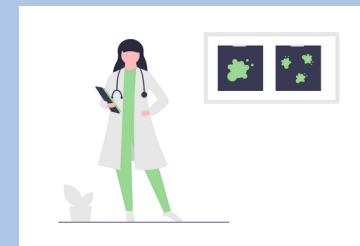

Away from AI, practitioners and researchers are still interested in the role of human contact in teaching and learning, and we saw [unexpected synergy between gamification and tutoring \(FR\)](#), [the art and science of mentoring students \(EN\)](#), how to improve students' [engagement through the use of the portfolio \(FR\)](#) [testing and learning from mistakes \(FR\)](#) are reshaping professional training. We also invite you to discover and test the [active learning \(FR\)](#) teaching rooms we have in [our facilities \(FR\)](#).

Improving interpersonal skills is still an important part of education and maybe you have already used [forum theater \(FR\)](#) as a teaching method. This method reminds us with the importance of [Learning Loops \(EN\)](#) and [collaborative Learning \(FR\)](#).

Research

We selected two research outputs for you:

- [an open AI manual for teachers \(multiple languages\)](#) produced by the University of Nantes and financed by the EU.
- Dive into [complex thinking \(EN\)](#) in an article produced but the institute for the future for education, which has very close links to sustainable development skills that Audencia and other actors | higher education are implementing in their curricula

Looking for some inspirations?

Innovation, educational innovation...what exactly are we talking about? [Here's an article \(FR\)](#) which, after reviewing the main definitions of pedagogical innovation, proposes to consider it as something more akin to a change in culture, rather than a technical, artistic or commercial innovation.

To complete this theoretical reflection, we'd like to share with you some of the ideas presented this summer at the 5th international colloquium of the Institut des compétences et de l'innovation de SciencesPo Paris, entitled "[Crossing perspectives: great transformations and pedagogy](#)", and an interesting discussion on [pedagogical innovation and leadership \(FR\)](#).

To enrich our understanding of the future of schools, teaching, and the integration of environmental issues, the [Knowledge Hub](#) has acquired new books, among which "[Les jeunes élites face au travail : regards croisés entre Polytechnique et Harvard](#)" stands out as a favorite for this term.
